Fred R. Robertson

Dear Roger,

What you have done with what happened to Randy is excellent. If it gets no attention I encourage you to consider trying to place it in a magzine and that if you do you give it a conclusionx that wraps and points it all up in terms of the refusal of the major media to meetx its responsibilities in a society like ours not only by monolithic support of one side of a controversy that requires public discussion but by going farther and suppressing what officialdom does not want to be known and discussed. CJR?

I have a few small suggestions to avoid criticism.

Page 1, graf ± 2, add " those" before "firmly established conspiracy theorists."

Page 2, line 10, add "on this" before ~~Xxxxthisxx~~"the entry wound."

Page 2, second graf up, I think referring to Randy's work as "the conspiracy theory"should be changed. Something proving a conspiracy. Not "theory".

Page 2, two grafs up, I think you should change what you say about Artwohol having no "professional qualific tion" in radiology. He is not a radiologist but he must spend much of his time reading X-rays. Could be misunderstood as a slur.

I'd hoped to finish this and mail it when I had to leave to go across town as once or twice you did with me several yars ago about a week later than this, when you admired all the flowering trees on those streets but I could not make it in time to mail it on the way back from the podiatrist, who was squeezing me in before his afternoon started. The earliest trees are beinning to blossom now. Beautiful. I especially like it because it means I've just made another one. I was 81 Friday.

I have the impression that close to what you have written could be accepted by the CJR and might start some discussion if it could appear there.

I hope you made it a point to send a copy to those you name and criticize by name. A direct challenge to them.

While I doubt it will, that being the state of our corruption, I do hope it works. And I think you've done well with it.

Best to you and Randy,
